

TB-0368

ACTUATE 8 MIGRATION SCHEDULE

Issue Date: September 22, 2005
Effective Date: December 31, 2005
Section/Group: ITS Authentication and Directory Services
Submitted by: Darrus McBride
Approved by: Darcie Trimble

The following is an update to ITS Technical Bulletin TB-0363. The dates from the original technical bulletin have been extended to allow more flexibility for the customer.

ITS now has an Actuate production environment based on Actuate version 8. Agencies utilizing the existing Actuate environment (version 6) will have until the end of the calendar year to migrate their reports to this new environment.

Infrastructure Changes from Actuate Version 6 to Actuate Version 8

- Actuate 8 is based on the ActivePortal, which no longer supports the ReportCast engine.
- ReportCast will no longer be supported.
- The anonymous roll will be mapped to the "Everyone" group in the directory.
- UMD and RSSE are strictly enforced.
- The Actuate management console and AppAdmin will be used to administer the Actuate report server.
- Page level security is now supported and can be tied to the following UMD attributes:
 - Phone (telephonenumber)
 - Agency Number (utiw-agencynumber)
 - Low Org (utiw-loworg)
 - Workforce ID (workforceid)

If you have questions or if you encounter problems converting any of your reports, please contact Customer Support at (801) 538-3440.
